

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions and listings of claims in the application:

LISTING OF CLAIMS:

1. (currently amended): A multi-piece solid golf ball comprising a solid core of at least one layer, an intermediate layer enclosing the solid core, and a cover enclosing the intermediate layer, wherein

said intermediate layer has a gage G_1 of 0.8 to 1.5 mm and a Shore D hardness of ~~53~~56 to ~~65~~58, said cover has a gage G_2 of 0.5 to 1.3 mm and a Shore D hardness of 37 to 50 and is formed of an urethane resin, and the gage G_1 of said intermediate layer and the gage G_2 of said cover satisfy $[G_1/(G_1+G_2)] \times 100 \geq 45\%$.

2. (previously presented): The multi-piece solid golf ball of claim 1 wherein said intermediate layer has a gage G_1 of 1 to 1.5 mm.

3. (original): The multi-piece solid golf ball of claim 1 wherein said solid core undergoes a deflection of 3 to 4.5 mm under an applied load of 100 kg.

4. (original): The multi-piece solid golf ball of claim 1 wherein said cover is formed of a cover material having a melt index of at least 3.0 dg/min at 190°C.

5. (canceled).

6. (previously presented): The multi-piece solid golf ball of claim 1 wherein said multi-piece golf ball is a three piece solid golf ball consisting of a solid core, an intermediate layer, and a cover.

7. (previously presented): The multi-piece solid golf ball of claim 1 wherein said intermediate layer is formed of ionomer resins.

8. (canceled).

9. (canceled).

10. (previously presented): The multi-piece solid golf ball of claim 1 wherein the gage G_1 of said intermediate layer and gage G_2 of said cover satisfy $65\% \geq [G_1/(G_1+G_2)] \times 100 \geq 50\%$.

11. (new): A multi-piece solid golf ball comprising a solid core of at least one layer, an intermediate layer enclosing the solid core, and a cover enclosing the intermediate layer, wherein said intermediate layer has a gage G_1 of 0.8 to 1.5 mm and a Shore D hardness of 53 to 54, said cover has a gage G_2 of 0.5 to 1.3 mm and a Shore D hardness of 37 to 50 and is formed

of an urethane resin, and the gage G_1 of said intermediate layer and the gage G_2 of said cover satisfy $[G_1/(G_1+G_2)] \times 100 \geq 45\%$.
